Next Seminar

If you live on the Treasure Coast, please join us for our June seminar which is THIS Saturday, June 2, 2018. The cost is still just $8 a person and there'll be the usual coffee, tea, juice, donuts plus Joyce will be making hot breakfast foods so come a few minutes early!
The subject is: "Intel Inside" and it will be from 10:00 a.m.-12 Noon at Trinity United Methodist

Church in Jensen Beach, FL. (Click on the picture above to get directions, etc.) You can find an outline of what we plan to cover by visiting our seminar page which you'll find **HERE**.

Forward to a Friend

Webinar

It's been awhile since we've had a webinar! We hope you'll join us for our webinar on June 6, 2018 at 11:00 a.m. We'll cover the password management tool, RoboForm. Remember, even if you can't attend but you're interested in the information we'll share, sign up anyway and we'll send you the follow-up info. Register **HERE**.

Question of the Week

Question: "I keep hearing about something called AI. Microsoft, for one, seems to really be pushing it. What the heck is AI?"

Answer: You're going to be hearing more and more about AI. And, yes, Microsoft is one of the driving forces behind AI. So, what is AI? AI is another of those wonderful computer acronyms and it stand for Artificial Intelligence. *AI is the simulation of human intelligence processes by machines, especially computer systems. It has gained prominence recently due, in part, to big data, or the increase in speed, size and variety of data businesses are now collecting. AI can perform tasks such as identifying patterns in the data more efficiently than humans, enabling businesses to gain more insight out of their data.*[1]

AI can be used in education, finance, business and many other places. In the near future, we'll be expanding Keystone Computer Concepts' involvement in AI and we'll take you along with us so watch for more AI information!
