# Question Of The Week
# June 4, 2018

Dear Valued Customer,

Here's this week's Question of the Week and the answer is a video!  Enjoy!

This past Saturday, we had our last seminar until September.  Thanks to everyone who came out on Saturday.  Hope you enjoyed the breakfast food!

Have a great week.

John

**Forward to a Friend**

In this day and age, photos are such an important part of the computing world. Smartphones and tablets have changed the way we take photos. It's an exciting time because everyone can take awesome photos without expensive cameras and equipment. Unlike the "old days" we can snap as many photos as we want without hurting our pocketbook.

Like every great opportunity, there is a downside to the ease of photo-taking. Understanding the types of photos, organizing them, adjusting them and sharing them with other people can be challenging.

That being said, I've put together a training program with nearly 15 hours of videos, PowerPoint presentations and printable PDFs. In this training: you'll learn the different types of photos; why photo size and file size aren't the same thing; why a printed photo may look different than how it appears on the screen; which photo program to use; how to eliminate duplicate photos; a sensible procedure for naming and organizing your photos; and, much, much more.

If you were to purchase training from us - at our best price of $40 an hour - this photo training program would cost $600. But, we're offering these 15 hours of photo training for just $20. The price includes the USB drive with all the training plus the postage to mail it to you. To order your photo training program, just click the box below. We've covered photo training in several of our seminars and I'm excited to share this additional training with all of our customers, not just those who live on the Treasure Coast.

## Webinar

It's been awhile since we've had a webinar! We hope you'll join us for our webinar on June 6, 2018 at 11:00 a.m. We'll cover the password management tool, RoboForm. Remember, even if you can't attend but you're interested in the information we'll share, sign up anyway and we'll send you the follow-up info. Register **HERE**.
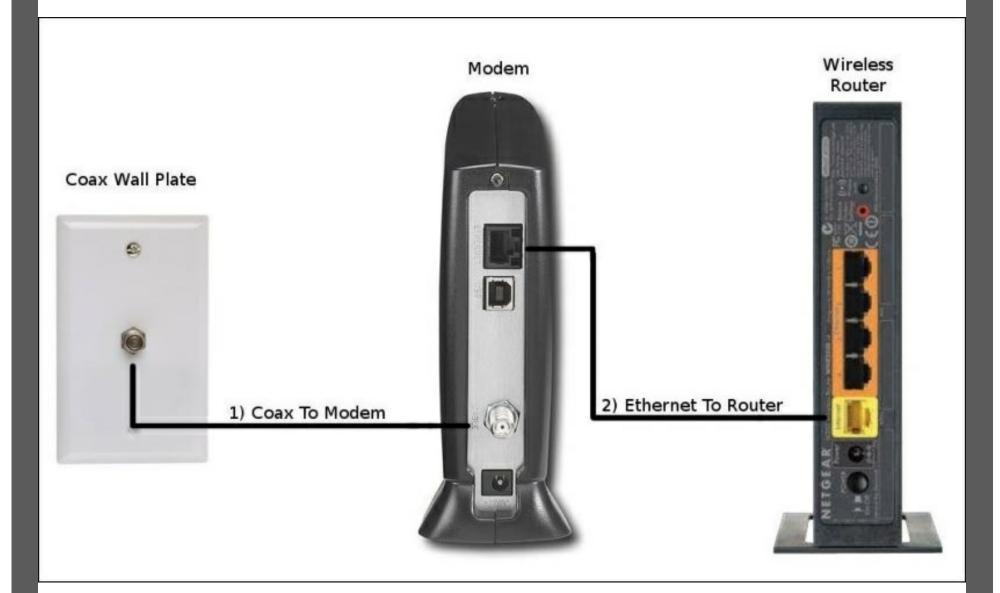

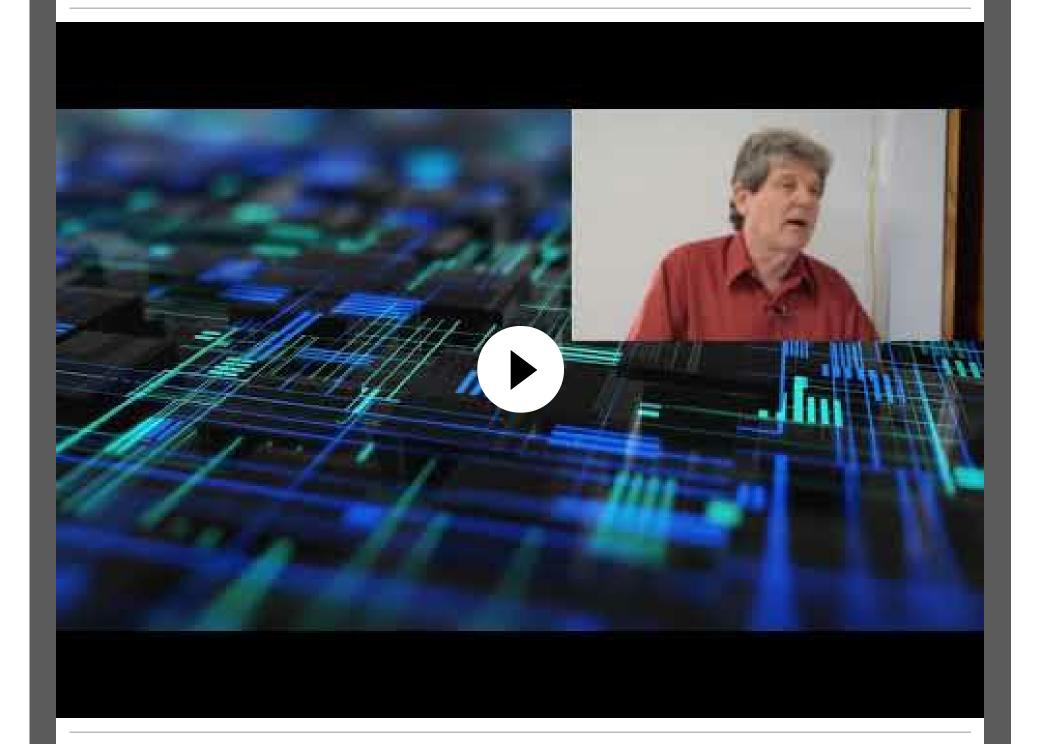

**Next Seminar**

It's time for our summer break from seminars! There will be no seminar in July or August (but we will have webinars). Our next seminar will be Saturday, September 8, 2018. The seminar title is "I Am Not A Crook" and it will be from 10:00 a.m.-12 Noon.

# Question of the Week

**Question:** "I keep hearing that the FBI wants me to reboot my router. Do I need to do that?"

**Answer:** The answer to this week's question is the Microsoft answer - "It depends!" To find out if you need to do this, please watch the following video:

There's still time to get Dad one of our favorite gifts - Chicago Steaks!
