Question Of The Week

May 6, 2019

Dear Valued Customer,

Did you know we offer a free computer education?

If you read our blog each time we post (six times a week), you will gain great knowledge when it comes to the computing world. And, this education doesn't cost you a penny - just 3-4 minutes per post. Visit our blog now by clicking [HERE](#).

REMINDER: Microsoft and/or Apple will NEVER call you out of the blue, they will NEVER cause a window to appear on your device warning you that it's infected and that you should not turn it off or you'll lose everything. These are SCAMS.

If you live on Florida's Treasure Coast, we hope to see you this Saturday!

John
772-408-4425

Next Seminar

If you live on the Treasure Coast, our next seminar is THIS Saturday, May 11, 2019. The seminar title is "God Bless America" and it will be from 10:00 a.m.-12 Noon. The cost is still \$8 per person. Come a little early for coffee, juice, donuts and other goodies. No need to register ahead of time, just come join us! You may bring your laptop or tablet if you like but they are not necessary for the class. Our seminar will be held in the Fellowship Hall of [Trinity United Methodist Church, 2221 NE Savannah Rd., Jensen Beach, FL 34957](#)
(Click on the church name for directions.)

Father's Day is coming. One of my favorite affiliate companies is offering free shipping plus a Father's Day gift. Why not click the image and check it out!

Question of the Week

Question: "I have a Windows 7 computer. Can't I just upgrade my computer when support ends? Do I have to buy a new computer?"

Answer:

If you are one of our customers still using a Windows 7 machine, time is almost up. Support ends in just eight months. Once support ends, any Windows 7 machine on the Internet will be a sitting duck for hackers.

When it comes to upgrading a Windows 7 machine, I'll ask you this question: Is your computer three years old or older? If your answer is "Yes" then it's time to buy a new computer.

Computers that originally came with Windows 7 and are older than three years have processors that are way out-dated and usually don't have enough memory to run Windows 10 correctly. Plus - no one really wants to hear this - the average lifespan of a laptop is 3 1/2 years and a desktop 4 1/2-5 years. There really is no sense putting money into a machine that is near or over the average.

If you still have a Windows 7 machine, the time to purchase a new computer and have your data transferred is sooner rather than later. I really don't suggest waiting until the last minute.

When you're looking for a new computer, there are many, many things to consider. We have great deals on computers all the time and we'll explain all the technical stuff you need to know. But, even if you don't buy from us, I'm begging you - please don't purchase based on price alone. I can almost guarantee that if you simply buy based on a low price, you'll be unhappy.
